

// Q1. Check Even/Odd and Positive/Negative

```
import java.util.Scanner;

public class Q_01 {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a number: ");

        int num = sc.nextInt();

        if (num > 0) {

            System.out.println("The number is Positive");

            if (num % 2 == 0) {

                System.out.println("It is Even");

            } else {

                System.out.println("It is Odd");

            }

        } else if (num < 0) {

            System.out.println("The number is Negative");

        }

        if (num % 2 == 0) {

            System.out.println("It is Even");

        } else {

            System.out.println("It is Odd");

        }

        } else {

            System.out.println("The number is Zero");

        }

    }

}
```

Output:

A screenshot of a Java IDE's terminal window. The terminal has tabs for 'Problems', 'Output', 'Debug Console', 'Terminal', and 'Ports'. The 'Terminal' tab is active, showing a PowerShell session. The user runs 'java Q_01.java' in the directory 'C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4'. The program prompts 'Enter a number: 45', outputs 'The number is Positive', and 'It is Odd'. The prompt 'PS C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4>' is visible at the end of the output.

```
PS C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4> java Q_01.java
Enter a number: 45
The number is Positive
It is Odd
PS C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4>
```

// Q2. Largest of three numbers

```
import java.util.Scanner;
```

```
public class Q_02 {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter first number: ");
        int a = sc.nextInt();
        System.out.print("Enter second number: ");
        int b = sc.nextInt();
        System.out.print("Enter third number: ");
        int c = sc.nextInt();
        if (a >= b && a >= c) {
            System.out.println("Largest number is: " + a);
        }
    }
}
```

```

    else if (b >= a && b >= c) {
        System.out.println("Largest number is: " + b);
    }
    else {
        System.out.println("Largest number is: " + c);
    }
    sc.close();
}
}

```

Output:

```

PS C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4> java Q_02.java
Enter first number: 33
Enter second number: 44
Enter third number: 55
Largest number is: 55
PS C:\Users\harsh\OneDrive\Desktop\Java\Assignment_4>

```

// Q3. Number divisibility check

```

import java.util.Scanner;

public class Q_03 {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print("Enter a number: ");
